

Master Paging Console MPC-16

This console is designed to be used in combination with the MPM8.16 mono system. A total of 20 groups of zones can be addressed with this console. A chime is implemented to lead a message.

The MPM8.16 can't be programmed with the console, however it is possible to assign 'Master-Slave' combinations.

Main features

- The 'Master-Slave' or 'Room-combining' function can couple zones together, to obtain the same signal source for use in flexible meeting rooms or in multi area restaurants.
- Possibility to address 20 independent groups.

The MPC-16 paging console can be connected to the [MPM8.16 mono](#) systems.
